COMPANY AT A GLANCE

Tortoise Power and Energy Infrastructure Fund, Inc. (NYSE: TPZ) invests in a portfolio of fixed income and equity securities issued by power and energy infrastructure companies. The Fund's goal is to provide stockholders a high level of current income, with a secondary objective of capital appreciation. The Fund seeks to invest in a portfolio of companies that provide stable and defensive characteristics throughout economic cycles.

Infrastructure Asset Class

Increasingly, institutions have allocated a portion of their investment portfolio to infrastructure due to its desirable investment characteristics, which include:

- Long-term stable asset class with low historical volatility
- Attractive risk-adjusted returns
- Investment diversification through low historical correlation with other asset classes
- A potential inflation hedge through equity investments

For Investors Seeking

- A fund which invests in the historically stable and defensive power and energy infrastructure sectors
- Monthly distributions
- Fund invested in fixed income securities with low volatility and more safety as well as MLPs for growth
- One Form 1099 per stockholder at the end of the year, thus avoiding multiple K-1s and multiple state filings related to individual MLP partnership investments

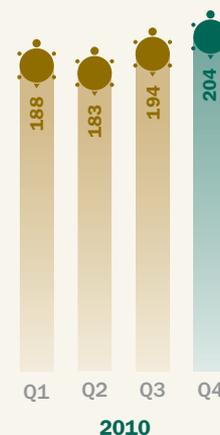

Power and Energy Infrastructure Operations

At the heart of the infrastructure asset class is power and energy infrastructure, illustrated in the box below:

Power Infrastructure — The ownership and operation of asset systems that provide electric power generation (including renewable energy), transmission and distribution.

Energy Infrastructure — The ownership and operation of a network of pipeline assets to transport, store, gather, and/or process crude oil, refined petroleum products, natural gas or natural gas liquids (including renewable energy).

DEAR FELLOW STOCKHOLDERS,

Tortoise Power and Energy Infrastructure Fund invests in securities issued by power and energy infrastructure companies. While we focus primarily in fixed income securities which offer greater investor protection of principal than equity investments, we believe our MLP equity component provides a partial hedge against inflation.

Our goal is to provide stockholders a high level of current income, with a secondary objective of capital appreciation. While we maintained an attractive yield during the year, the primary value creation for stockholders was driven by increased valuation of both our debt and equity holdings and the resulting rise in our stock price. Our fixed income investments increased in value as a result of lower interest rates and the narrowing of spreads stemming from the improved credit quality of power infrastructure companies as the economic recovery continued. MLP valuations also improved as a result of continued distribution growth and market recognition of the quality of the MLP cash flow streams.

Power and Energy Infrastructure Sector Review and Outlook

In our fiscal year ended Nov. 30, 2010, the TPZ Benchmark Index*, comprised of a blend of debt and equity securities issued by power and energy infrastructure companies, had a total return of 18.9 percent compared to approximately 10 percent for the S&P 500.

Power and energy infrastructure companies benefited from the underlying strength of their business fundamentals. Economic activity drove higher electricity demand and low prices for both natural gas and coal utilized by power infrastructure companies supported stability. Demand for services to gather, process, transport and store crude oil, natural gas and natural gas liquids rose as the economy began to improve. Power infrastructure growth was focused on transmission, renewables and natural gas fired generation, with an emphasis on regulated assets. In the MLP sector alone, integrated and other energy companies sold approximately \$40 billion of assets to MLPs (including dropdowns and general partner transactions) and over \$10 billion was invested in new internal growth projects in fiscal 2010. Capital markets were supportive as power and energy infrastructure companies enjoyed strong access to capital.

We expect growth capital next year to be consistent with recent levels of investment and efforts to focus on transmission and renewables in power infrastructure and the development of natural gas and liquids energy infrastructure in the EagleFord shale in South Texas, the Bakken shale around North Dakota, the Marcellus shale located in the Appalachia region, and the Haynesville shale in east Texas and northern Louisiana.

Fund Performance Review and Outlook

Our total assets increased from \$174.0 million on Nov. 30, 2009, to \$204.1 million on Nov. 30, 2010, resulting primarily from market appreciation of our investments. Our total return based on market value, including the reinvestment of distributions, was 4.7 percent for the fourth fiscal quarter and 28.8 percent for our fiscal year.

During 2010, we paid monthly distributions of \$0.125 per share (\$1.50 annualized). This represented an annualized yield of 6.5 percent based on our fiscal year closing price of \$23.06. Our payout ratio of distributions to distributable cash flow (DCF) for the fiscal year was 99.3 percent, which is in line with our expectations to pay out at least 95 percent of DCF to stockholders annually. For tax purposes, distributions to stockholders for 2010 were 88 percent ordinary income, six percent long-term capital gain and six percent return of capital.

We ended our fiscal year with leverage (including bank debt and senior notes) at 16 percent of total assets, well below our long-term target of 20 percent. The market appreciation of our investments led to an improvement of our leverage position as we allowed our leverage as a percent of total assets to decrease over the near term. Through the utilization of interest rate swaps, we have essentially fixed the rate on approximately 83 percent of our leverage, which has a weighted average maturity of 2.7 years and a weighted average cost of 3.46 percent at Nov. 30, 2010. We believe a primarily fixed-rate strategy with laddered maturities enhances the predictability and sustainability of our distributable cash flow.

Additional information about our financial performance is available in the Key Financial Data and Management's Discussion of this report.

Conclusion

We have a philosophy of comprehensive risk management, especially in portfolio selection and leverage policy. We seek to invest in a portfolio of power and energy infrastructure companies that provide stable and defensive characteristics throughout economic cycles. We focus on companies that operate essential assets with fee-based cash flows that generate high current yield with predictable revenues and stable cost structures. Our portfolio is anchored in fixed income securities, with our equity component providing a potential inflation hedge.

Thank you for your investment in TPZ. We look forward to a promising 2011.

Sincerely,
The Managing Directors
Tortoise Capital Advisors, L.L.C.

The adviser to Tortoise Power and Energy Infrastructure Fund, Inc.

KEY FINANCIAL DATA *(Supplemental Unaudited Information)*

(dollar amounts in thousands unless otherwise indicated)

The information presented below regarding Distributable Cash Flow and Selected Operating Ratios is supplemental non-GAAP financial information, which we believe is meaningful to understanding our operating performance. The Selected Operating Ratios are the functional equivalent of EBITDA for non-investment companies, and we believe they are an important supplemental measure of performance and promote comparisons from period-to-period. Supplemental non-GAAP measures should be read in conjunction with our full financial statements.

(1) Represents the period from July 31, 2009 (commencement of operations) through November 30, 2009.

(2) Q1 is the period from December through February. Q2 is the period from March through May. Q3 is the period from June through August. Q4 is the period from September through November.

(3) Leverage costs include interest expense, interest rate swap expenses and other leverage expenses.

(4) "Net investment income" on the Statement of Operations is adjusted as follows to reconcile to Distributable Cash Flow (DCF): increased by the return of capital on MLP distributions, the value of paid-in-kind distributions amortization of debt issuance costs and the change in methodology for

calculating amortization of premiums or discounts; and decreased by realized and unrealized gains (losses) on interest rate swap settlements.

(5) Distributions paid as a percentage of Distributable Cash Flow.

(6) Computed by averaging month-end values within each period.

(7) The balance on the short-term credit facility was \$12,700,000 as of November 30, 2010.

(8) Computed by averaging daily values within each period.

(9) Annualized for periods less than one full year. Operating ratios contained in our Financial Highlights are based on average net assets.

MANAGEMENT'S DISCUSSION (Unaudited)

Management's Discussion

The information contained in this section should be read in conjunction with our Financial Statements and the Notes thereto. In addition, this report contains certain forward-looking statements. These statements include the plans and objectives of management for future operations and financial objectives and can be identified by the use of forward-looking terminology such as "may," "will," "expect," "intend," "anticipate," "estimate," or "continue" or the negative thereof or other variations thereon or comparable terminology. These forward-looking statements are subject to the inherent uncertainties in predicting future results and conditions. Certain factors that could cause actual results and conditions to differ materially from those projected in these forward-looking statements are set forth in the "Risk Factors" section of our public filings with the SEC.

Overview

Tortoise Power and Energy Infrastructure Fund, Inc.'s ("TPZ") primary investment objective is to provide a high level of current income, with a secondary objective of capital appreciation. We seek to provide our stockholders a vehicle to invest in a portfolio consisting primarily of securities issued by power and energy infrastructure companies. Power infrastructure operations use asset systems to provide electric power generation (including renewable energy), transmission and distribution. Energy infrastructure operations use a network of pipeline assets to transport, store, gather and/or process crude oil, refined petroleum products (including biodiesel and ethanol), natural gas or natural gas liquids. We believe the power and energy infrastructure sectors provide stable and defensive characteristics throughout economic cycles. A majority of the investments are in fixed income securities with the remainder invested in equities which provide growth potential.

TPZ is a registered non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the "1940 Act"), and expects to qualify as a regulated investment company ("RIC") under the U.S. Internal Revenue Code of 1986, as amended (the "Code"). Tortoise Capital Advisors, L.L.C. (the "Adviser") serves as investment adviser.

Company Update

Market values of both our debt and equity investments ended the 4th quarter 2010 above their levels at August 31, 2010, contributing to an increase of \$10.5 million in total assets. Distributions received from our investments during the quarter were in line with our expectations while the increase in total assets during the quarter resulted in increased asset-based expenses. Total leverage decreased as a percent of total assets and we maintained our monthly distribution of \$0.125 per share. Additional information on the results of our operations is discussed in more detail below.

Critical Accounting Policies

The financial statements are based on the selection and application of critical accounting policies, which require management to make significant estimates and assumptions. Critical accounting policies are those that are both important to the presentation of our financial condition and results of operations and require management's most difficult, complex, or subjective judgments. Our critical accounting policies are those applicable to the valuation of investments and certain revenue recognition matters as discussed in Note 2 in the Notes to Financial Statements.

Determining Distributions to Stockholders

Unlike most RIC's which pay distributions based upon income, we pay monthly distributions based upon our distributable cash flow ("DCF"). Our Board of Directors reviews the distribution rate quarterly, and may adjust the monthly distributions throughout the year.

Determining DCF

DCF is simply income from investments less expenses. Income from investments includes the accrued interest from corporate bonds, cash distributions and paid-in-kind distributions from MLPs and related companies and dividends earned from short-term investments. The total expenses include current or anticipated operating expenses and leverage costs. Each are summarized for you in the table on page 2 and are discussed in more detail below.

The Key Financial Data table discloses the calculation of DCF and should be read in conjunction with this discussion. The difference between income from investments in the DCF calculation and total investment income as reported in the Statement of Operations, is reconciled as follows: (1) GAAP recognizes distribution income from MLPs and common stock on their ex-dates, whereas the DCF calculation reflects distribution income on their pay dates; (2) GAAP recognizes that a significant portion of the cash distributions received from MLPs are characterized as a return of capital and therefore excluded from investment income, whereas the DCF calculation includes the return of capital; (3) income from investments in the DCF calculation includes the value of dividends paid-in-kind (additional stock or units), whereas such amounts are not included as income for GAAP purposes; and (4) amortization of premium or discount for all securities is calculated using the yield to worst methodology for GAAP purposes while yield to call is used in calculating amortization for long-dated hybrid securities in the DCF calculation. The treatment of expenses in the DCF calculation also differs from what is reported in the Statement of Operations. In addition to the total operating expenses, including expense reimbursement, as disclosed in the Statement of Operations, the DCF calculation reflects interest expense and realized and unrealized gains (losses) on interest rate swap settlements as leverage costs. A reconciliation of Net Investment Income to DCF is included below.

Income from Investments

We seek to achieve our investment objectives by investing in income-producing fixed income and equity securities of companies that we believe offer attractive distribution rates. We evaluate each holding based upon its contribution to our investment income and its risk relative to other potential investments.

Total income from investments for the 4th quarter 2010 was approximately \$3.5 million, a slight decrease as compared to 3rd quarter 2010. This decrease is due to an exchange during the quarter from a higher yielding debt investment to a lower yielding investment, offset by distribution increases from our MLPs.

Expenses

We incur two types of expenses: (1) operating expenses, consisting primarily of the advisory fee; and (2) leverage costs. On a percentage basis, operating expenses before leverage costs were an annualized 1.01 percent of average total assets for 4th quarter 2010 as compared to 1.05 percent for the 3rd quarter 2010. Advisory fees for 4th quarter 2010 increased 4.5 percent from 3rd quarter 2010 as a result of increased market values and average managed assets during the quarter.

While the contractual advisory fee is 0.95 percent of average monthly managed assets, the Adviser has agreed to waive an amount equal to 0.15, 0.15 and 0.10 percent of average monthly managed assets for the calendar years 2010, 2011 and 2012, respectively.

Leverage costs consist of two major components: (1) the direct interest expense, which will vary from period to period, as our senior notes and revolving credit facility have variable rates of interest; and (2) the realized and unrealized gain or loss on our interest rate swap settlements. Detailed information on our senior notes and revolving credit facility is included in the Liquidity and Capital Resources section below.

MANAGEMENT'S DISCUSSION *(Unaudited)*

(Continued)

As indicated in Note 10 of our Notes to Financial Statements, we have entered into \$27 million notional amount of interest rate swap contracts with Wells Fargo Bank in an attempt to reduce a portion of the interest rate risk arising from our leveraged capital structure. TPZ has agreed to pay Wells Fargo Bank a fixed rate while receiving a floating rate based upon the 1-month or 3-month U.S. Dollar London Interbank Offered Rate ("LIBOR"). The spread between the fixed swap rate and LIBOR is reflected in our Statement of Operations as a realized or unrealized gain when LIBOR exceeds the fixed rate (Wells Fargo Bank pays TPZ the net difference) or a realized or unrealized loss when the fixed rate exceeds LIBOR (TPZ pays Wells Fargo Bank the net difference). The interest rate swap contracts have a weighted average fixed rate of 2.13 percent and weighted average remaining maturity of approximately 2.8 years at November 30, 2010. This swap arrangement effectively fixes the cost on approximately 83 percent of our outstanding leverage as of November 30, 2010 over the remaining swap period.

Total leverage costs for DCF purposes were approximately \$303,000 for the 4th quarter 2010, a decrease of approximately 8 percent as compared to 3rd quarter 2010 due primarily to improved terms included in the amendment to our credit facility which became effective September 14, 2010. This includes interest expense on our senior notes and bank credit facility and accrued swap settlement costs of approximately \$121,000. The average annualized total cost of leverage (total leverage costs divided by average outstanding leverage) was 3.75 percent for 4th quarter 2010.

Distributable Cash Flow

For 4th quarter 2010, our DCF was approximately \$2.65 million, an increase of 0.6 percent as compared to 3rd quarter 2010. This increase is the net result of the change in distributions and expenses as outlined above. On August 9, 2010, we declared monthly distributions for the 2010 4th fiscal quarter of \$0.125 per share. This is unchanged as compared to 3rd quarter 2010.

Our dividend payout ratio as a percentage of DCF decreased from 98.9 percent during 3rd quarter 2010 to 98.2 percent during 4th quarter 2010. A payout of less than 100 percent of DCF provides cushion for on-going management of the portfolio, changes in leverage costs and other expenses. An on-going payout ratio in excess of 100 percent will, over time, erode the earning power of a portfolio and may lead to lower distributions or portfolio managers taking on more risk than they otherwise would.

Net investment income on the Statement of Operations is adjusted as follows to reconcile to DCF for fiscal year 2010 and the 4th quarter 2010 (in thousands):

	2010	4th Qtr 2010
Net Investment Income	\$ 5,066	\$ 1,353
Adjustments to reconcile to DCF:		
Dividends paid in stock	2,345	598
Return of capital on distributions	3,296	750
Amortization of debt issuance costs	38	10
Interest rate swap expenses	(497)	(121)
Change in amortization methodology	225	60
DCF	<u>\$10,473</u>	<u>\$ 2,650</u>

Liquidity and Capital Resources

We had total assets of \$204.1 million at year-end. Our total assets reflect the value of our investments, which are itemized in the Schedule of Investments. It also reflects cash, interest and receivables and any expenses that may have been prepaid. During the 4th quarter 2010, total assets increased from \$193.6 million to \$204.1 million, an increase of \$10.5 million which was primarily the result of net realized and unrealized gains on investments during the quarter (excluding return of capital on distributions reflected during the quarter).

Total leverage outstanding at November 30, 2010 of \$32.7 million is comprised of \$20 million floating rate senior notes and \$12.7 million outstanding on our bank credit facility. Through the utilization of our interest rate swaps, we have essentially fixed the rate on approximately 83 percent of our leverage with the remaining 17 percent floating based upon short-term LIBOR. Total leverage represented 16.0 percent of total assets. We've allowed leverage as a percent of total assets to decrease as market values increased rather than maintain leverage to total assets at the long-term target level of 20 percent of total assets. This allows the opportunity to add leverage when compelling investment opportunities arise. Temporary increases of up to 25 percent of our total assets may be permitted, provided that such leverage is consistent with the limits set forth in the 1940 Act, and that such leverage is expected to be reduced over time in an orderly fashion to reach our long-term target. Our leverage ratio is impacted by increases or decreases in investment values, issuance of equity and/or the sale of securities where proceeds are used to reduce leverage.

We have used leverage to acquire investments consistent with our investment philosophy. The terms of our leverage are governed by regulatory and contractual asset coverage requirements that arise from the use of leverage. Additional information on our leverage and asset coverage requirements is discussed in Note 9 in the Notes to Financial Statements. Our coverage ratio is updated each week on our Web site at www.tortoiseadvisors.com.

Taxation of our Distributions

We expect that distributions paid on common shares will generally consist of: (i) investment company taxable income (which includes, among other items, taxable interest and the excess of any short-term capital gains over net long-term capital losses); (ii) long-term capital gain (net gain from the sale of a capital asset held longer than 12 months over net short-term capital losses) and (iii) return of capital.

We may distribute additional capital gains in the last fiscal quarter if necessary to meet minimum distribution requirements and thus avoid being subject to excise taxes. If, however, we elect to retain any capital gains, we will be subject to U.S. capital gains taxes. The payment of those taxes will flow-through to stockholders as a tax credit to apply against their U.S. income tax payable on the deemed distribution of the retained capital gain.

For tax purposes, distributions paid to common stockholders for the calendar year ended December 31, 2010 were approximately 88 percent ordinary income (none of which is qualified dividend income), 6 percent long-term capital gain and 6 percent return of capital. A holder of our common stock would reduce their costs basis for income tax purposes by approximately 6 percent of the total distributions they received in 2010. This information is reported to stockholders on Form 1099-DIV and is available on our Web site at www.tortoiseadvisors.com.

(1) Commencement of Operations.

(2) Information presented relates to a share of common stock outstanding for the entire period.

(3) The per common share data for the period from July 31, 2009 through November 30, 2009 do not reflect the change in estimate of investment income and return of capital. See Note 2C to the financial statements for further disclosure.

(4) Not annualized. Total investment return is calculated assuming a purchase of common stock at the beginning of the period (or initial public offering price) and a sale at the closing price on the last day of the period reported (excluding brokerage commissions). The calculation also assumes reinvestment of distributions at actual prices pursuant to the Company's dividend reinvestment plan.

(5) Not annualized. Total investment return is calculated assuming a purchase of common stock at the beginning of period (or initial public offering price) and a sale at net asset value on the last day of the period. The calculation also assumes reinvestment of distributions at actual prices pursuant to the Company's dividend reinvestment plan.

(6) Annualized for periods less than one full year.

(7) The Company accrued \$1,660 and \$0 for the year ended November 30, 2010 and the period from July 31, 2009 through November 30, 2009, respectively, for current foreign tax expense. Ratio is less than 0.01% for the year ended November 30, 2010.

(8) Represents value of total assets less all liabilities and indebtedness not represented by long-term debt obligations and short-term borrowings at the end of the period divided by long-term debt obligations and short-term borrowings outstanding at the end of the period.

See accompanying Notes to Financial Statements.

NOTES TO FINANCIAL STATEMENTS

November 30, 2010

1. Organization

Tortoise Power and Energy Infrastructure Fund, Inc. (the "Company") was organized as a Maryland corporation on July 5, 2007, and is a non-diversified, closed-end management investment company under the Investment Company Act of 1940, as amended (the "1940 Act"). The Company's primary investment objective is to provide a high level of current income, with a secondary objective of capital appreciation. The Company seeks to provide its stockholders with a vehicle to invest in a portfolio consisting primarily of securities issued by power and energy infrastructure companies. The Company commenced operations on July 31, 2009. The Company's stock is listed on the New York Stock Exchange under the symbol "TPZ."

2. Significant Accounting Policies

A. Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amount of assets and liabilities, recognition of distribution income and disclosure of contingent assets and liabilities at the date of the financial statements. Actual results could differ from those estimates.

B. Investment Valuation

The Company primarily owns securities that are listed on a securities exchange or over-the-counter market. The Company values those securities at their last sale price on that exchange or over-the-counter market on the valuation date. If the security is listed on more than one exchange, the Company uses the price from the exchange that it considers to be the principal exchange on which the security is traded. Securities listed on the NASDAQ will be valued at the NASDAQ Official Closing Price, which may not necessarily represent the last sale price. If there has been no sale on such exchange or over-the-counter market on such day, the security will be valued at the mean between the last bid price and last ask price on such day.

The Company may invest up to 15 percent of its total assets in restricted securities. Restricted securities are subject to statutory or contractual restrictions on their public resale, which may make it more difficult to obtain a valuation and may limit the Company's ability to dispose of them. Investments in private placement securities and other securities for which market quotations are not readily available will be valued in good faith by using fair value procedures approved by the Board of Directors. Such fair value procedures consider factors such as discounts to publicly traded issues, time until conversion date, securities with similar yields, quality, type of issue, coupon, duration and rating. If events occur that affect the value of the Company's portfolio securities before the net asset value has been calculated (a "significant event"), the portfolio securities so affected will generally be priced using fair value procedures.

An equity security of a publicly traded company acquired in a direct placement transaction may be subject to restrictions on resale that can affect the security's liquidity and fair value. Such securities that are convertible or otherwise will become freely tradable will be valued based on the market value of the freely tradable security less an applicable discount. Generally, the discount will initially be equal to the discount at which the Company purchased the securities. To the extent that such securities are convertible or otherwise become freely tradable within a time frame that may be reasonably determined, an amortization schedule may be used to determine the discount.

The Company generally values debt securities at prices based on market quotations for such securities, except those securities purchased with 60 days or less to maturity are valued on the basis of amortized cost, which approximates market value.

The Company generally values its interest rate swap contracts using industry-accepted models which discount the estimated future cash flows based on the stated terms of the interest rate swap agreement by using interest rates currently available in the market, or based on dealer quotations, if available.

C. Security Transactions and Investment Income

Security transactions are accounted for on the date the securities are purchased or sold (trade date). Realized gains and losses are reported on an identified cost basis. Interest income is recognized on the accrual basis, including amortization of premiums and accretion of discounts. Dividend and distribution income is recorded on the ex-dividend date. Distributions received from the Company's investments in master limited partnerships ("MLPs") generally are comprised of ordinary income, capital gains and return of capital from the MLPs. The Company allocates distributions between investment income and return of capital based on estimates made at the time such distributions are received. Such estimates are based on historical information available from each MLP and other industry sources. These estimates may subsequently be revised based on actual allocations received from MLPs after their tax reporting periods are concluded, as the actual character of these distributions is not known until after the fiscal year end of the Company.

During the year ended November 30, 2010, the Company reallocated the amount of 2009 investment income and return of capital it recognized based on the 2009 tax reporting information received from the individual MLPs. This reclassification amounted to a decrease in net investment income of approximately \$137,900 or \$0.020 per share and an increase in unrealized appreciation of investments of approximately \$137,900 or \$0.020 per share for the year ended November 30, 2010.

D. Distributions to Stockholders

Distributions to common stockholders are recorded on the ex-dividend date. The Company intends to make monthly cash distributions of its investment company income to common stockholders. In addition, on an annual basis, the Company may distribute additional capital gains in the last fiscal quarter if necessary to meet minimum distribution requirements and thus avoid being subject to excise taxes. The amount of any distributions will be determined by the Board of Directors. Distributions to stockholders are recorded on the ex-dividend date. The character of distributions made during the year may differ from their ultimate characterization for federal income tax purposes. Distributions paid to stockholders in excess of investment company taxable income and net realized gains will be treated as return of capital to stockholders.

E. Federal Income Taxation

The Company qualifies as a regulated investment company ("RIC") under the U.S. Internal Revenue Code of 1986, as amended (the "Code"). As a result, the Company generally will not be subject to U.S. federal income tax on income and gains that it distributes each taxable year to stockholders if it meets certain minimum distribution requirements. The Company is required to distribute substantially all of its income, in addition to other asset diversification requirements. The Company is subject to a

NOTES TO FINANCIAL STATEMENTS

(Continued)

4 percent non-deductible U.S. federal excise tax on certain undistributed income unless the Company makes sufficient distributions to satisfy the excise tax avoidance requirement. The Company invests in MLPs, which generally are treated as partnerships for federal income tax purposes. As a limited partner in the MLPs, the Company reports its allocable share of the MLP's taxable income in computing its own taxable income.

The Company has adopted financial reporting rules regarding recognition and measurement of tax positions taken or expected to be taken on a tax return. The Company has reviewed all open tax years and major jurisdictions and concluded that there is no impact on the Company's net assets and no tax liability resulting from unrecognized tax benefits relating to uncertain income tax positions taken or expected to be taken on a tax return. All tax years since inception remain open to examination by federal and state tax authorities.

F. Offering and Debt Issuance Costs

Offering costs related to the issuance of common stock are charged to additional paid-in capital when the stock is issued. Debt issuance costs related to long-term debt obligations are capitalized and amortized over the period the debt is outstanding.

G. Derivative Financial Instruments

The Company uses derivative financial instruments (principally interest rate swap contracts) to manage interest rate risk. The Company has established policies and procedures for risk assessment and the approval, reporting and monitoring of derivative financial instrument activities. The Company does not hold or issue derivative financial instruments for speculative purposes. All derivative financial instruments are recorded at fair value with changes in fair value during the reporting period, and amounts accrued under the agreements, included as unrealized gains or losses in the Statement of Operations. Cash settlements under the terms of the interest rate swap agreements and termination of such agreements are recorded as realized gains or losses in the Statement of Operations.

H. Indemnifications

Under the Company's organizational documents, its officers and directors are indemnified against certain liabilities arising out of the performance of their duties to the Company. In addition, in the normal course of business, the Company may enter into contracts that provide general indemnification to other parties. The Company's maximum exposure under these arrangements is unknown, as this would involve future claims that may be made against the Company that have not yet occurred, and may not occur. However, the Company has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

I. Recent Accounting Pronouncement Standard on Fair Value Measurement

On January 21, 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update No. 2010-06, *Improving Disclosures about Fair Value Measurements*, which amends FASB Accounting Standards Codification Topic 820, *Fair Value Measurements and Disclosures*, and requires additional disclosures regarding fair value measurements. Specifically, the amendment requires reporting entities to disclose (i) the input and valuation techniques used to measure fair value for both recurring and nonrecurring fair value measurements, for Level 2 or Level 3 positions, (ii) transfers between all levels (including Level 1 and Level 2) on a gross

basis (i.e. transfers out must be disclosed separately from transfers in) as well as the reason(s) for the transfer, and (iii) purchases, sales, issuances, and settlements on a gross basis in the Level 3 rollforward rather than as one net number. The effective date of the amendment is for interim and annual periods beginning after December 15, 2009; however, the requirement to provide the Level 3 activity for purchases, sales, issuances, and settlements on a gross basis will be effective for interim and annual periods beginning after December 15, 2010. The Company has adopted the disclosures required by this amendment, which did not have a material impact on the financial statements.

3. Concentration of Risk

Under normal circumstances, the Company intends to invest at least 80 percent of total assets (including assets obtained through potential leverage) in equity securities of companies that derive more than 50 percent of their revenue from power or energy operations and no more than 25 percent of the total assets in equity securities of MLPs as of the date of purchase. The Company will invest a minimum of 60 percent of total assets in fixed income securities, which may include up to 25 percent of its assets in non-investment grade rated fixed income securities. In determining application of these policies, the term "total assets" includes assets obtained through leverage. Companies that primarily invest in a particular sector may experience greater volatility than companies investing in a broad range of industry sectors. The Company may, for defensive purposes, temporarily invest all or a significant portion of its assets in investment grade securities, short-term debt securities and cash or cash equivalents. To the extent the Company uses this strategy, it may not achieve its investment objective.

4. Agreements

The Company has entered into an Investment Advisory Agreement with Tortoise Capital Advisors, L.L.C. (the "Adviser"). Under the terms of the agreement, the Company pays the Adviser a fee equal to an annual rate of 0.95 percent of the Company's average monthly total assets (including any assets attributable to leverage) minus accrued liabilities (other than debt entered into for purposes of leverage and the aggregate liquidation preference of outstanding preferred stock) ("Managed Assets"), in exchange for the investment advisory services provided. The Adviser has agreed to a fee waiver of 0.15 percent of average monthly Managed Assets for the period from July 31, 2009 through December 31, 2011, and a fee waiver of 0.10 percent of average monthly Managed Assets for the period from January 1, 2012 through December 31, 2012.

U.S. Bancorp Fund Services, LLC serves as the Company's administrator. The Company pays the administrator a monthly fee computed at an annual rate of 0.04 percent of the first \$1,000,000,000 of the Company's Managed Assets, 0.03 percent on the next \$1,000,000,000 of Managed Assets and 0.002 percent on the balance of the Company's Managed Assets.

Computershare Trust Company, N.A. serves as the Company's transfer agent and registrar and Computershare Inc. serves as the Company's dividend paying agent and agent for the automatic dividend reinvestment plan.

U.S. Bank, N.A. serves as the Company's custodian. The Company pays the custodian a monthly fee computed at an annual rate of 0.004 percent on the average daily market value of the Company's portfolio assets, subject to a minimum annual fee of \$4,800, plus portfolio transaction fees.

NOTES TO FINANCIAL STATEMENTS

(Continued)

5. Income Taxes

It is the Company's intention to continue to qualify as a regulated investment company under Subchapter M of the Internal Revenue Code and distribute all of its taxable income. Accordingly, no provision for federal income taxes is required in the financial statements.

The amount and character of income and capital gain distributions to be paid, if any, are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles. These differences are primarily due to differences in the timing of recognition of gains or losses on investments. Permanent book and tax basis differences resulted in the reclassification of \$5,544,548 to undistributed net investment income (loss), \$(4,846,309) to accumulated net realized gain and \$(698,239) to additional paid in capital.

The tax character of distributions paid to common stockholders for the years ending November 30, 2010 and November 30, 2009 were as follows:

	11/30/2010	11/30/2009
Ordinary income*	\$ 9,062,432	\$ 1,082,394
Long-term capital gain	637,923	—
Return of capital	698,239	1,494,360
Total distributions	<u>\$10,398,594</u>	<u>\$ 2,576,754</u>

*For Federal income tax purposes, distributions of short-term capital gains are treated as ordinary income distributions.

As of November 30, 2010, the components of accumulated earnings on a tax basis were as follows:

Unrealized appreciation	\$ 39,732,441
Other temporary differences	<u>(32,877)</u>
Accumulated earnings	<u>\$ 39,699,564</u>

As of November 30, 2010, the aggregate cost of securities for federal income tax purposes was \$159,319,924. The aggregate gross unrealized appreciation for all securities in which there was an excess of value over tax cost was \$42,306,087, the aggregate gross unrealized depreciation for all securities in which there was an excess of tax cost over value was \$0 and the net unrealized appreciation was \$42,306,087.

6. Fair Value of Financial Instruments

Various inputs are used in determining the value of the Company's investments. These inputs are summarized in the three broad levels listed below:

- Level 1 – quoted prices in active markets for identical investments
- Level 2 – other significant observable inputs (including quoted prices for similar investments, market corroborated inputs, etc.)
- Level 3 – significant unobservable inputs (including the Company's own assumptions in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

The following table provides the fair value measurements of applicable Company assets and liabilities by level within the fair value hierarchy as of November 30, 2010. These assets and liabilities are measured on a recurring basis.

Description	Fair Value at			
	November 30, 2010	Level 1	Level 2	Level 3
Assets				
Debt Securities:				
Corporate Bonds ^(a)	\$ 115,475,841	\$ 5,361,900	\$ 110,113,941	\$ —
Total Debt Securities	<u>115,475,841</u>	<u>5,361,900</u>	<u>110,113,941</u>	<u>—</u>
Equity Securities:				
Master Limited Partnerships and Related Companies ^(a)	86,092,302	86,092,302	—	—
Total Equity Securities	<u>86,092,302</u>	<u>86,092,302</u>	<u>—</u>	<u>—</u>
Other:				
Short-Term Investment ^(b)	57,868	57,868	—	—
Total Other	<u>57,868</u>	<u>57,868</u>	<u>—</u>	<u>—</u>
Total Assets	<u>\$ 201,626,011</u>	<u>\$ 91,512,070</u>	<u>\$ 110,113,941</u>	<u>\$ —</u>
Liabilities				
Interest Rate Swap Contracts	\$ 985,024	\$ —	\$ 985,024	\$ —
Total	<u>\$ 200,640,987</u>	<u>\$ 91,512,070</u>	<u>\$ 109,128,917</u>	<u>\$ —</u>

(a) All other industry classifications are identified in the Schedule of Investments.

(b) Short-term investment is a sweep investment for cash balances in the Company at November 30, 2010.

Valuation Techniques

In general, and where applicable, the Company uses readily available market quotations based upon the last updated sales price from the principal market to determine fair value. This pricing methodology applies to the Company's Level 1 investments.

Some debt securities are fair valued using a market value obtained from an approved pricing service which utilizes a pricing matrix based upon yield data for securities with similar characteristics or from a direct written broker-dealer quotation from a dealer who has made a market in the security. This pricing methodology applies to the Company's Level 2 assets.

Interest rate swap contracts are valued by using industry-accepted models which discount the estimated future cash flows based on a forward rate curve and the stated terms of the interest rate swap agreement by using interest rates currently available in the market, or based on dealer quotations, if available, which applies to the Company's Level 2 liabilities.

There were no transfers between levels for the year ended November 30, 2010.

NOTES TO FINANCIAL STATEMENTS

7. Restricted Securities

Certain of the Company's investments are restricted and are valued as determined in accordance with procedures established by the Board of Directors, as more fully described in Note 2. The table below shows the principal amount, acquisition date(s), acquisition cost, fair value and the percent of net assets which the securities comprise at November 30, 2010.

Company	Principal Amount	Acquisition Date(s)	Acquisition Cost	Fair Value	Fair Value as Percent of Net Assets
DCP Midstream LLC, 9.750%, 03/15/2019	\$4,000,000	08/07/09- 08/27/09	\$ 4,769,350	\$ 5,244,924	3.1%
El Paso Corp., 6.500%, 09/15/2020	4,000,000	09/24/10	4,000,000	4,132,472	2.4
Enogex LLC, 6.250%, 03/15/2020	4,000,000	02/26/10- 04/22/10	4,118,593	4,400,124	2.6
Florida Gas Transmission Co., LLC, 5.450%, 07/15/2020	500,000	07/08/10	499,130	539,154	0.3
IPALCO Enterprises, Inc., 7.250%, 04/01/2016	2,000,000	11/03/09	2,015,000	2,150,000	1.3
Midcontinent Express Pipelines, LLC, 6.700%, 09/15/2019	6,000,000	09/09/09- 03/02/10	6,055,570	6,578,778	3.9
NGPL PipeCo, LLC, 7.119%, 12/15/2017	4,000,000	07/29/10- 09/28/10	4,280,000	4,444,000	2.6
North American Energy Alliance LLC, 10.875%, 06/01/2016	2,800,000	09/24/09- 10/08/09	2,895,000	3,108,000	1.8
Source Gas, LLC, 5.900%, 04/01/2017	5,770,000	04/21/10	5,544,521	5,666,463	3.4
Southern Star Central Gas Pipeline, Inc., 6.000%, 06/01/2016	2,000,000	08/24/09	<u>1,970,000</u>	<u>2,241,270</u>	<u>1.3</u>
			<u>\$36,147,164</u>	<u>\$38,505,185</u>	<u>22.7%</u>

8. Investment Transactions

For the period from December 1, 2009 through November 30, 2010, the Company purchased (at cost) and sold securities (proceeds received) in the amount of \$41,145,173 and \$41,333,658 (excluding short-term debt securities), respectively.

9. Long-Term Debt Obligations

The Company has \$20,000,000 aggregate principal amount of Series A private senior notes (the "Notes") outstanding. Holders of the Notes are entitled to receive quarterly cash interest payments at an annual rate that resets each quarter based on the 3-month LIBOR plus 1.87 percent. The Notes are not listed on any exchange or automated quotation system.

The Notes are unsecured obligations of the Company and, upon liquidation, dissolution or winding up of the Company, will rank: (1) senior to all of the Company's outstanding preferred shares (if any); (2) senior to all of the Company's outstanding common shares; (3) on parity with any unsecured creditors of the Company and any unsecured senior securities representing indebtedness of the Company and (4) junior to any secured creditors of the Company.

The Notes are redeemable in certain circumstances at the option of the Company. The Notes are also subject to a mandatory redemption if the Company fails to meet asset coverage ratios required under the 1940 Act or the rating agency guidelines if such failure is not waived or cured. At November 30, 2010, the Company was in compliance with asset coverage covenants and basic maintenance covenants for its senior notes.

At November 30, 2010, fair value of the Series A Notes approximates the carrying amount because the interest rate fluctuates with changes in interest rates available in the current market. The following table shows the issue date, maturity date, notional/carrying amount, current rate as of November 30, 2010, and the weighted-average rate for the year ended November 30, 2010.

Series	Issue Date	Maturity Date	Notional/ Carrying Amount	Current Rate	Weighted-Average Rate
Series A	November 6, 2009	November 6, 2014	\$20,000,000	2.16%	2.20%

NOTES TO FINANCIAL STATEMENTS

(Continued)

10. Interest Rate Swap Contracts

The Company has entered into interest rate swap contracts in an attempt to protect itself from increasing interest expense on its leverage resulting from increasing short-term interest rates. A decline in interest rates may result in a decline in the value of the swap contracts, which may result in a decline in the net assets of the Company. In addition, if the counterparty to the interest rate swap contracts defaults, the Company would not be able to use the anticipated receipts under the swap contracts to offset the interest payments on the Company's leverage. At the time the interest rate swap contracts reach their scheduled termination, there is a risk that the Company would not be able to obtain a replacement transaction, or that the terms of the replacement would not be as favorable as on the expiring transaction. In addition, if the Company is required to terminate any swap contract early due to the Company failing to maintain a required 300 percent asset coverage of the liquidation value of the outstanding senior notes or if the Company loses its credit rating on its senior notes, then the Company could be required to make a termination payment, in addition to redeeming all or some of the senior notes. Details of the interest rate swap contracts outstanding as of November 30, 2010, are as follows:

Counterparty	Maturity Date	Notional Amount	Fixed Rate Paid by the Company	Floating Rate Received by the Company	Asset (Liability) Derivatives
Wells Fargo Bank, N.A.	11/06/2011	\$ 6,000,000	1.12%	1-month U.S. Dollar LIBOR	\$ (40,495)
Wells Fargo Bank, N.A.	11/06/2012	5,000,000	1.81%	3-month U.S. Dollar LIBOR	(111,161)
Wells Fargo Bank, N.A.	11/06/2012	1,000,000	1.73%	1-month U.S. Dollar LIBOR	(22,360)
Wells Fargo Bank, N.A.	11/06/2014	15,000,000	2.66%	3-month U.S. Dollar LIBOR	(811,008)
		<u>\$ 27,000,000</u>			<u>\$ (985,024)</u>

The Company is exposed to credit risk on the interest rate swap contracts if the counterparty should fail to perform under the terms of the interest rate swap contracts. The amount of credit risk is limited to the net appreciation of the interest rate swap contracts, if any, as no collateral is pledged by the counterparty.

The unrealized depreciation of interest rate swap contracts in the amount of \$586,913 is included in the Statement of Operations for the year ended November 30, 2010. Cash settlements under the terms of the interest rate swap contracts in the amount of \$499,365 are recorded as realized losses for the period ended November 30, 2010. The total notional amount of all open swap agreements at November 30, 2010 is indicative of the volume of this derivative type for the year ended November 30, 2010.

11. Credit Facility

The Company had a revolving loan commitment amount of \$18,000,000 that matured on September 14, 2010. U.S. Bank, N.A. served as a lender and the lending syndicate agent on behalf of other lenders participating in the credit facility. Outstanding balances on the credit facility accrued interest at a variable annual interest rate equal to one-month LIBOR plus 2.00 percent and unused portions of the credit facility accrued a non-usage fee equal to an annual rate of 0.25 percent.

On September 14, 2010, the Company entered into an amendment to its credit facility that extends the credit facility through September 14, 2011. The terms of the amendment provide for an unsecured revolving credit facility of \$18,000,000. During the extension, outstanding balances generally will accrue interest at a variable annual rate equal to one-month LIBOR plus 1.25 percent and unused portions of the credit facility will accrue a non-usage fee equal to an annual rate of 0.20 percent.

The average principal balance and interest rate for the period during which the credit facility was utilized during the year ended November 30, 2010 was approximately \$12,000,000 and 2.11 percent, respectively. At November 30, 2010, the principal balance outstanding was \$12,700,000 at an interest rate of 1.51 percent.

Under the terms of the credit facility, the Company must maintain asset coverage required under the 1940 Act. If the Company fails to maintain the required coverage, it may be required to repay a portion of an outstanding balance until the coverage requirement has been met. At November 30, 2010, the Company was in compliance with the terms of the credit facility.

12. Common Stock

The Company has 100,000,000 shares of capital stock authorized and 6,940,986 shares outstanding at November 30, 2010. Transactions in common stock for the year ended November 30, 2010, were as follows:

Shares at November 30, 2009	6,898,481
Shares issued through reinvestment of distributions	42,505
Shares at November 30, 2010	<u>6,940,986</u>

13. Subsequent Events

On December 31, 2010, the Company paid a distribution in the amount of \$0.125 per common share, for a total of \$867,623. Of this total, the dividend reinvestment amounted to \$145,110.

The Company has performed an evaluation of subsequent events through the date the financial statements were issued and has determined that no additional items require recognition or disclosure.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

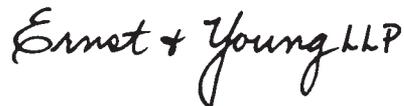

The Board of Directors and Stockholders Tortoise Power and Energy Infrastructure Fund, Inc.

We have audited the accompanying statement of assets and liabilities of Tortoise Power and Energy Infrastructure Fund, Inc. (the Company), including the schedule of investments, as of November 30, 2010, and the related statements of operations and cash flows for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the periods indicated therein. These financial statements and financial highlights are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and

disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of November 30, 2010, by correspondence with the custodian. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Tortoise Power and Energy Infrastructure Fund, Inc. at November 30, 2010, the results of its operations and its cash flows for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the periods indicated therein, in conformity with U.S. generally accepted accounting principles.

ADDITIONAL INFORMATION *(Unaudited)*

Notice to Stockholders

For stockholders that do not have a November 30, 2010 tax year end, this notice is for information purposes only. For stockholders with a November 30, 2010 tax year end, please consult your tax advisor as to the pertinence of this notice. For the fiscal year ended November 30, 2010, the Company is designating the following items with regard to common stock distributions paid during the year.

Return of Capital Distributions	Long Term (15% Rate) Capital Gain Distributions ⁽¹⁾	Ordinary Income Distributions	Total Distributions	Qualifying Dividends	Qualifying For Corporate Dividends Rec. Deduction ⁽²⁾
6.72%	6.13%	87.15%	100.00%	0%	0%

(1) The Company designates long-term capital gain distributions per IRC Code Sec. 852(b)(3)(C).

(2) Represents the portion of Ordinary Distributions which qualify for the "Corporate Dividends Received Deduction."

Director and Officer Compensation

The Company does not compensate any of its directors who are "interested persons," as defined in Section 2(a)(19) of the 1940 Act, nor any of its officers. For the year ended November 30, 2010, the aggregate compensation paid by the Company to the independent directors was \$55,000. The Company did not pay any special compensation to any of its directors or officers.

Forward-Looking Statements

This report contains "forward-looking statements" within the meaning of the Securities Act of 1933 and the Securities Exchange Act of 1934. By their nature, all forward-looking statements involve risks and uncertainties, and actual results could differ materially from those contemplated by the forward-looking statements. Several factors that could materially affect the Company's actual results are the performance of the portfolio of investments held by it, the conditions in the U.S. and international financial, petroleum and other markets, the price at which shares of the Company will trade in the public markets and other factors discussed in filings with the SEC.

Proxy Voting Policies

A description of the policies and procedures that the Company uses to determine how to vote proxies relating to portfolio securities owned by the Company and information regarding how the Company voted proxies relating to the portfolio of securities during the 12-month period ended June 30, 2010 are available to stockholders (i) without charge, upon request by calling the Company at (913) 981-1020 or toll-free at (866) 362-9331 and on the Company's Web site at www.tortoiseadvisors.com; and (ii) on the SEC's Web site at www.sec.gov.

Form N-Q

The Company files its complete schedule of portfolio holdings for the first and third quarters of each fiscal year with the SEC on Form N-Q. The Company's Form N-Q is available without charge upon request by calling the Company at (866) 362-9331 or by visiting the SEC's Web site at www.sec.gov. In addition, you may review and copy the Company's Form N-Q at the SEC's Public Reference Room in Washington D.C. You may obtain information on the operation of the Public Reference Room by calling (800) SEC-0330.

The Company's Form N-Qs are also available on the Company's Web site at www.tortoiseadvisors.com.

Statement of Additional Information

The Statement of Additional Information ("SAI") includes additional information about the Company's directors and is available upon request without charge by calling the Company at (866) 362-9331 or by visiting the SEC's Web site at www.sec.gov.

Certifications

The Company's Chief Executive Officer has submitted to the New York Stock Exchange the annual certification as required by Section 303A.12(a) of the NYSE Listed Company Manual.

The Company has filed with the SEC, as an exhibit to its most recently filed Form N-CSR, the certification of its Chief Executive Officer and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act.

Privacy Policy

In order to conduct its business, the Company collects and maintains certain nonpublic personal information about its stockholders of record with respect to their transactions in shares of the Company's securities. This information includes the stockholder's address, tax identification or Social Security number, share balances, and distribution elections. We do not collect or maintain personal information about stockholders whose share balances of our securities are held in "street name" by a financial institution such as a bank or broker.

We do not disclose any nonpublic personal information about you, the Company's other stockholders or the Company's former stockholders to third parties unless necessary to process a transaction, service an account, or as otherwise permitted by law.

To protect your personal information internally, we restrict access to nonpublic personal information about the Company's stockholders to those employees who need to know that information to provide services to our stockholders. We also maintain certain other safeguards to protect your nonpublic personal information.

Automatic Dividend Reinvestment Plan

If a stockholder's shares are registered directly with the Company or with a brokerage firm that participates in the Company's Automatic Dividend Reinvestment Plan (the "Plan"), all distributions are automatically reinvested for stockholders by the Agent in additional shares of common stock of the Company (unless a stockholder is ineligible or elects otherwise). Stockholders holding shares that participate in the Plan in a brokerage account may not be able to transfer the shares to another broker and continue to participate in the Plan. Stockholders who elect not to participate in the Plan will receive all distributions payable in cash paid by check mailed directly to the stockholder of record (or, if the shares are held in street or other nominee name, then to such nominee) by Computershare, as dividend paying agent. Distributions subject to tax (if any) are taxable whether or not shares are reinvested.

If, on the distribution payment date, the net asset value per share of the common stock is equal to or less than the market price per share of common stock plus estimated brokerage commissions, the Company will issue additional shares of common stock to participants. The number of shares will be determined by dividing the dollar amount of the distribution to the participant by the greater of the net asset value per share or 95 percent of the market price on the payment date of the distribution. Otherwise, shares generally will be purchased on the open market by the Agent as soon as possible following the distribution payment date, but in no event later than 30 days after such date except as necessary to comply with applicable law. The plan previously provided that the Company would use primarily newly-issued common shares to implement the Plan, whether its shares were trading at a premium or at a discount to net asset value and that the number of shares to be issued to a stockholder would be determined by dividing the total dollar amount of the distribution payable to such stockholder by the market price per share of the Company's common stock at the close of regular trading on the New York Stock Exchange on the distribution payment date. There are no brokerage charges with respect to shares issued directly by the Company as a result of distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred

ADDITIONAL INFORMATION *(Unaudited)*

(Continued)

with respect to the Agent's open-market purchases in connection with the reinvestment of distributions. If a participant elects to have the Agent sell part or all of his or her common stock and remit the proceeds, such participant will be charged a transaction fee of \$15.00 plus a \$0.05 per share brokerage commission on the shares sold.

Stockholders may elect not to participate in the Plan by sending written, telephone or Internet instructions to Computershare, as dividend paying agent, at the address, telephone number or website address set forth below. Participation is completely voluntary and may be terminated or resumed at any time without penalty. A termination will be effective with respect to a particular distribution if notice is received prior to the record date for such distribution. If a participant has terminated participation in the Plan but continues to have Company common shares registered in his or her name, the participant may re-enroll in the Plan by giving notice in writing to the Agent.

Additional information about the Plan may be obtained by writing to Computershare Trust Company, N.A., P.O. Box 43078, Providence, R.I. 02940-3078. You may also contact Computershare by phone at (800) 426-5523 or visit their Web site at www.computershare.com.

Approval of the Investment Advisory Agreement

In approving the renewal of the Investment Advisory Agreement in November 2010, the directors who are not "interested persons" (as defined in the Investment Company Act of 1940) of the Company ("Independent Directors") requested and received extensive data and information from the Adviser concerning the Company and the services provided to it by the Adviser under the Investment Advisory Agreement. In addition, the Independent Directors requested and received data and information from the Adviser, which also included information from independent, third-party sources, regarding the factors considered in their evaluation.

Factors Considered

The Independent Directors considered and evaluated all the information provided by the Adviser. The Independent Directors did not identify any single factor as being all-important or controlling, and each Independent Director may have attributed different levels of importance to different factors. In deciding to renew the agreement, the Independent Directors' decision was based on the following factors.

Nature, Extent and Quality of Services Provided. The Independent Directors considered information regarding the history, qualification and background of the Adviser and the individuals responsible for the Adviser's investment program, the adequacy of the number of the Adviser personnel and other Adviser resources and plans for growth, use of affiliates of the Adviser, and the particular expertise with respect to energy infrastructure companies, MLP markets and financing (including private financing). The Independent Directors concluded that the unique nature of the Company and the specialized expertise of the Adviser in the niche market of MLPs made it uniquely qualified to serve as the advisor. Further, the Independent Directors recognized that the Adviser's commitment to a long-term investment horizon correlated well to the investment strategy of the Company.

Investment Performance of the Company and the Adviser, Costs of the Services To Be Provided and Profits To Be Realized by the Adviser and its Affiliates from the Relationship, and Fee Comparisons. The Independent Directors reviewed and evaluated information regarding the Company's performance (including quarterly, last twelve months, and from inception) and the performance of the other Adviser accounts (including other investment companies), and information regarding the nature of the markets during the performance period, with a particular focus on the MLP sector. The Independent Directors also considered the Company's performance as compared to comparable closed-end funds for the relevant periods.

The Adviser provided detailed information concerning its cost of providing services to the Company, its profitability in managing the Company, its overall profitability, and its financial condition. The Independent Directors reviewed with the Adviser the methodology used to prepare this financial information. This financial information regarding the Adviser is considered in order to evaluate the Adviser's financial condition, its ability to continue to provide services under the Investment Advisory Agreement, and the reasonableness of the current management fee, and was, to the extent possible, evaluated in comparison to other closed-end funds with similar investment objectives and strategies.

The Independent Directors considered and evaluated information regarding fees charged to, and services provided to, other investment companies advised by the Adviser (including the impact of any fee waiver or reimbursement arrangements and any expense reimbursement arrangements), fees charged to separate institutional accounts by the Adviser, and comparisons of fees of closed-end funds with similar investment objectives and strategies, including other MLP investment companies, to the Company. The Directors also considered the Adviser's contractual agreement to waive fees in the amount of 0.15 percent of its 0.95 percent investment advisory fee for the period from its initial public offering through December 31, 2011 and in the amount of 0.10 percent of its 0.95 percent investment advisory fee for the period from January 1, 2012 through December 31, 2012. The Independent Directors concluded that the fees and expenses that the Company is paying under the Investment Advisory Agreement are reasonable given the quality of services provided under the Investment Advisory Agreement and that such fees and expenses are comparable to, and in many cases lower than, the fees charged by advisers to comparable funds.

Economies of Scale. The Independent Directors considered information from the Adviser concerning whether economies of scale would be realized as the Company grows, and whether fee levels reflect any economies of scale for the benefit of the Company's stockholders. The Independent Directors concluded that economies of scale are difficult to measure and predict overall. Accordingly, the Independent Directors reviewed other information, such as year-over-year profitability of the Adviser generally, the profitability of its management of the Company specifically, and the fees of competitive funds not managed by the Adviser over a range of asset sizes. The Independent Directors concluded the Adviser is appropriately sharing any economies of scale through its competitive fee structure and through reinvestment in its business to provide stockholders additional content and services.

Collateral Benefits Derived by the Adviser. The Independent Directors reviewed information from the Adviser concerning collateral benefits it receives as a result of its relationship with the Company. They concluded that the Adviser generally does not use the Company's or stockholder information to generate profits in other lines of business, and therefore does not derive any significant collateral benefits from them.

The Independent Directors did not, with respect to their deliberations concerning their approval of the continuation of the Investment Advisory Agreement, consider the benefits the Adviser may derive from relationships the Adviser may have with brokers through soft dollar arrangements because the Adviser does not employ any such arrangements in rendering its advisory services to the Company. Although the Adviser may receive research from brokers with whom it places trades on behalf of clients, the Adviser does not have soft dollar arrangements or understandings with such brokers regarding receipt of research in return for commissions.

Conclusions of the Directors

As a result of this process, the Independent Directors, assisted by the advice of legal counsel that is independent of the Adviser, taking into account all of the factors discussed above and the information provided by the Adviser, unanimously concluded that the Investment Advisory Agreement between the Company and the Adviser is fair and reasonable in light of the services provided and should be renewed.
